PROJECTS

AI Mind Map Generator

The **AI Mind Map Generator** is an innovative tool designed to streamline knowledge organization. As a front-end developer, I contributed to this project, which automates the creation of mind maps from text input. Key features include:

- **Automated Mind Maps:** The tool intelligently analyzes content and generates professional mind maps, eliminating manual drawing and organization.
- **Efficiency Boost:** By leveraging AI, users save time and effort, allowing them to focus on understanding and applying information.
- **User-Friendly Interface:** The AI Mind Map Generator offers a seamless experience, allowing users to input text and receive beautifully crafted mind maps.

YouTube Channel Analyzer

The **YouTube Channel Analyzer** is a versatile tool that extracts valuable insights from any YouTube video link. As a front-end developer, I contributed to this project, which offers the following features:

- **Playlist Overview:** Input any YouTube video link, and the tool instantly retrieves all playlists associated with the channel. You'll gain a comprehensive view of the content organization.
- **Playlist Durations:** Discover the total duration of each playlist. Whether you're analyzing your own channel or researching competitors, this data is essential for strategic content planning.
- **User-Friendly Interface:** The YouTube Channel Analyzer provides an intuitive experience, allowing users to input video links and access playlist details effortlessly.
